

Dear Funding Commission

Hello, my name is Amanda, I am from Brazil and I moved to Manchester NH 1 year ago then I started at Manchester middle School. In my first experience I had a lot of resource and enough materials so that all students could study, the teachers taught very well, there were friendly peoples to talk to, there are many computers (mainly in the library) and an excellent weather, there were several books in the library that can be read, there was not so much of a difficult homework and had a lot of equipment to play sports. But at beginning I had a lot of difficulty understanding what other people were talking about and made me feel nervous, the school lunch tasted weird and bad (in my opinion), there weren't that many classes or programs. I remember a situation where my father and I went to talk to a teacher and the office person (I don't remember her name) treated us with arrogance.

This is my first time in a High School here in Manchester/NH. We have the internet but is not the best, there are not so many computers, there are not so many teachers to teach us. I am asking the Funding Commission to invest more money to improve the internet, more teachers, more classes or programs to teach new languages/cultures such as: French, Japanese and etc.

Best Regards,  
Amanda
