

To school funding commission,

Hi my name is BITOKENJA, and I go to a Manchester high school. I grew up in a small country called Tanzania, but now I am in America. My experience at my school is to have better education in school. Last year, I had Biology and Health education, and those two classes were so difficult. And then I was like, “oh god” there was so much to those classes. But this year, I have better classes like I never had before.

Another thing I want to say is we need to have better books for more different classes, or books from another country or different languages. This year, we have students from another countries, but some students are not in school yet because of COVID-19. That’s why all students are not in school.

At my high school we need more classes because this year we’ve got new students and new needs. And we need the internet, more chromebook and more students for new classes like playing soccer class. Please give us more funding so we can have equitable education.

Thank you,

Bitokenja
