

# to the school funding commission,

Hi, my name is Fady, and I go to a Manchester high school. I am from Egypt and I was living in Egypt, but now I live in Manchester Nh. I grew up going to school in my country (Egypt), for 11 years. This was middle school, and also I went to high school for 1 year there. My experience in middle school was not bad and not good. The school had enough **resources**, internet and computers for students. I went to high school for 1 year and my experience in this school was bad. It had never technology, books, sports classes and supplies. I was not happy from this experience in this school. Now, I go to my new high school in Manchester that has very different buildings and a lot of activity. It has computers for students and a lot of programs with other businesses and colleges. I like this experience to have a great **education**.

I think the problem in my new school is the internet. It needs to be fixing. We also need to make more activities, sports and put books in different languages for students (and make better food). To solve these problems, we need more **funding** from the State of NH. Right now, we don't have enough funding. My solution is the people are living in big and good houses and paying tax, he benefits himself and that's not fair. The people should pay tax and benefits for all the NH, not for him only. Please give us more equitable funding.

Thank you,

Fady
