To the School Funding Commission,

Hi my name is Jhomar. My family comes from Mexico. I live in Manchester, NH. I go to a Manchester High School. I have almost graduated; I am a junior.

I want to talk about the food at my school. It is good. I like it, but the bad thing is that they repeat it, and I don't have an appetite for it. I would like them to provide something else to drink, because they only give milk, and it does not taste good with the food.

It would be nice if you help our school to make more food choices so we can have more selections. Also, we need more teachers so we have better classes and more options for study. We can propose classes like soccer class or theater class so if we don't like the class, and we need the credit, we can choose another type of art or gym class.

Thanks for reading my letter.

Sincerely,

Jhomar
