

Dear School Funding Commission,

Hi, my name is Nathaniel. I'm from Puerto Rico and I like sports. I go to a high school in Manchester. School is great, the classes are very interesting and the teachers help a lot when I need their help. The bathroom of the school is clean and the school smells good every day. The schools in my country Puerto Rico the classes were the same every year and didn't learn much but the food was super good and the teachers were friendly and strict. My first year at west I was a freshman I only knew a bit of English and had no friends just me and my brother. I was super nervous. The food at my school is not so good. I want to change it. I love to play baseball but the teams at here are not good. They need more students, they need a baseball program like practice all winter physical practice. The baseball program at Puerto Rico was big, had a lot of people and practiced every day physically, plays and batting.

I would like the School Funding Commission to provide our school in Manchester with more funding so that we can have better food for everyone, and for better sports teams. Both of these are important in all schools. I am hoping the Commission will really think about this.

Thank you,
Nathaniel
