

Dear School Funding Commission,

My name is Wilondja, and I go to a Manchester High School. I am from Tanzania and I live in Manchester, NH. In my High School we have great teachers. The teachers are great because they have been helping me so much and other students. My teachers helped me with my homework and helped me to learn English. Learning English can help me to get into college. And I am very happy to have them at my High School.

I've been in Manchester High School for three years and I've seen a lot of stuff that we don't have in my school. I would like to tell you that, in our School we need to have more computers, more Students, more Teachers, more sports supplies. All of those things we don't have. I would like you to think about and we need your to help our school to get those things. I hope you can help our school and if you can help us our school will look better than before.

Thank you,
Wilondja
