

To the School Funding Commission,

Hi my name is Yaneicis Suazo , and I go to a Manchester high school. I am from the Dominican republic, and now I live in Manchester, NH. Since I came from my country I felt a little nervous because I was going to enter a very different school. I felt so important to enter there because they have given me good teaching support every day, and they give many opportunities and that you have to know and take advantage of them. The changes I want for the my school includes an excellent secondary school, but I think that it should change some techniques such as food, the internet, and activities about different cultures to learn more about them.¶

They can also bring in more teachers to teach us more languages. The options of courses that have not been offered are very great, very good for the students. I really like the school in this country, it is wonderful. This is why I am asking the School Funding Commission to help us with funding so we can have an even better school.

Thank you,

Yaneicis
